Telecon with [redacted] - 5 May 1961

STAT

This date [redacted] called from California advising that from 12-28 June [redacted] would be running additional demonstrations. He pointed out that command and control problems with computer hookups would be involved and would be of considerable interest to us. I told him that in view of the fact that three of our people were in California now it was likely that we could schedule a visit within those dates while covering other work. Please bear same in mind in scheduling West Coast travel for June. I told [redacted] I would call him around the 1st of June on this matter per his request. Clearances are to go to the [redacted] security officer at [redacted] with a copy to [redacted]
